PROGRAM OVERVIEW

ACEC Tennessee has developed a competency-based leadership program focused on senior, mid-level, and emerging high potential leaders in both the private and public sectors. The competencies included in this customized program include: self-knowledge, building effective teams, delegation, communication/presentation skills, conflict management, political savvy, business acumen, and interpersonal savvy. The program participants will gain leadership skills while networking with members from other ACEC Tennessee member firms, and federal and state government agencies.

The 2019 Leadership PE program will include an orientation session in January and four additional monthly sessions held in locations across the state. Each session will be 1.5 days with the exception of the orientation session, which will be two full days. Sessions will be facilitated by representatives from partnering agencies, including the State of Tennessee, the Tennessee Valley Authority, and the US Army Corps of Engineers. Sessions will typically include educational topics, team building activities, networking opportunities, and a tour of a partner agency facility. All participants who complete the course will be recognized in a graduation ceremony held in conjunction with the last session.
